

HELP!!! MacOS plötzlich weg nach CPU Wechsel von Ryzen 3 auf Ryzen 7. Dualboot PC (WIN11Pro + MacOS Ventura 13.3+)

Beitrag von „fabiosun“ vom 25. Oktober 2023, 17:34

Does windows start?

if so

- 1) open CMD as admin
- 2) diskpart
- 3) list disk
- 4) be sure which one is OSX disk (ie disk 2)
- 5 sel disk 2
- 6) sel part 1
- 7)assign letter=b

in this way you assign a letter to your EFI partition and this will mount your OSX EFI partition

to see inside you have to use or total commander or OCAT or browse it with Task manager
browse (i use this method)

you can copy or modify things to recover any problems

ps

If you are confident reading this instructions you can proceed , otherwise do nothing 😊
