

Anleitung für Broadcom-WLAN-Patch unter macOS Sonoma

Beitrag von „MacGrummel“ vom 28. November 2023, 20:27

Die soll ja im Normalfall ohne Zusätze laufen können.

Ich hab Deine PList mal durch den OC Validator geschoben: richtig falsch sind nur die ganzen Einträge mit Arch. Damit kann OC nicht umgehen, die Kexte müssen schon entpackt sein.

```
OC Validate

NOTE: This version of ocvalidate is only compatible with OpenCore version 0.9.6!

Kernel->Add[2]->Arch is borked (Can only be Any, i386, and x86_64)!
Kernel->Add[2]->BundlePath does NOT contain .kext suffix!
Kernel->Add[2]->PlistPath does NOT contain .plist suffix!
Kernel->Add[2]->BundlePath (length 140) is too long (should not exceed 122)!
Kernel->Add[2]->ExecutablePath (length 0) is too long (should not exceed 4294967277)!
Kernel->Add[2]->PlistPath (length 0) is too long (should not exceed 4294967277)!
Kernel->Add[3]->Arch is borked (Can only be Any, i386, and x86_64)!
Kernel->Add[3]->BundlePath does NOT contain .kext suffix!
Kernel->Add[3]->PlistPath does NOT contain .plist suffix!
Kernel->Add[3]->BundlePath (length 144) is too long (should not exceed 122)!
Kernel->Add[3]->ExecutablePath (length 0) is too long (should not exceed 4294967273)!
Kernel->Add[3]->PlistPath (length 0) is too long (should not exceed 4294967273)!
Kernel->Add[4]->Arch is borked (Can only be Any, i386, and x86_64)!
Kernel->Add[4]->BundlePath does NOT contain .kext suffix!
Kernel->Add[4]->PlistPath does NOT contain .plist suffix!
Kernel->Add[4]->BundlePath (length 162) is too long (should not exceed 122)!
Kernel->Add[4]->ExecutablePath (length 0) is too long (should not exceed 4294967255)!
Kernel->Add[4]->PlistPath (length 0) is too long (should not exceed 4294967255)!
Kernel->Add[5]->Arch is borked (Can only be Any, i386, and x86_64)!
Kernel->Add[5]->BundlePath does NOT contain .kext suffix!
Kernel->Add[5]->PlistPath does NOT contain .plist suffix!
Kernel->Add[5]->BundlePath (length 197) is too long (should not exceed 122)!
Kernel->Add[5]->ExecutablePath (length 0) is too long (should not exceed 4294967220)!
Kernel->Add[5]->PlistPath (length 0) is too long (should not exceed 4294967220)!
Kernel->Add[16]->Arch is borked (Can only be Any, i386, and x86_64)!
Kernel->Add[16]->BundlePath does NOT contain .kext suffix!
Kernel->Add[16]->PlistPath does NOT contain .plist suffix!
Kernel->Block[1]->Arch is borked (Can only be Any, i386, and x86_64)!
Kernel->Block[1]->Strategy is borked (Can only be Disable or Exclude)!
CheckKernel returns 29 errors!
