

MacOS Ventura Blackscreen

Beitrag von „fabiosun“ vom 13. Februar 2024, 18:39

[Zitat von Fyynnn](#)

At first the apple logo with an loading screen and then this picture with the Blackscreen.

for second and forth icon?

could you try another GPU port? hdmi/dp?

edit

added a new config.plist

reset nvram when you see boot menu before you try your macOS disk or usb installer

edit2

added a second config.plist

this one has verbose mode on

take a video before black screen happen
