

Installation Sonoma 14.4: Boot-Schleife bei [EB|LOG:EXITBS:START]

Beitrag von „fabiosun“ vom 3. April 2024, 10:26

SecureBootModel from Default to Disabled (if you have a bootloop) others Config.plist parts are fine (you can disable many not mandatory kext to install, but SecureBootModel should be enough to set as i said to have success)
