

Eignung von Intel Arrow Lake CPUs mit z890 Boards für Hackintosh

Beitrag von „fabiosun“ vom 25. Juli 2025, 16:52

interesting, i had for my system a ProArt board i changed with hero i have now because PCIE slot for gpu were spaced in a better way for a dual tri slot gpu system

for both Proart and Hero there is no support for USB4 (asmedia chip) and i cant use it

Interesting if on z890 platform all those devices are supported well in OSX
