Da rödelt aktuell ein Raspberry Pi 3B, stellen die auch den Support für 32Bit RaspiOS ein?

Wenn es auf Debian basiert, dann schon.

Das Grundsystem unterstützt kein 32 Bit mehr, also wird auch der Ableger es nicht mehr unterstützen.

Ein Raspberry Pi 3 Model B hat eine 64 Bit CPU.

The screenshot shows the Raspberry Pi OS download page. It lists three versions of the operating system, each with its release date, system version, kernel version, Debian version, and size. Each version also has a 'Download' button and links for 'Download torrent', 'View archive', and 'View release notes'. The first version is 'Raspberry Pi OS (64-bit)' with a size of 1.142 GB. The second is 'Raspberry Pi OS with desktop and recommended software' with a size of 3.113 GB. The third is 'Raspberry Pi OS Lite' with a size of 473 MB. All versions were released on 13 May 2024.

Version	Release date	System	Kernel version	Debian version	Size
Raspberry Pi OS (64-bit)	13 May 2024	64-bit	6.12	12 (bookworm)	1.142 GB
Raspberry Pi OS with desktop and recommended software	13 May 2024	64-bit	6.12	12 (bookworm)	3.113 GB
Raspberry Pi OS Lite	13 May 2024	64-bit	6.12	12 (bookworm)	473 MB
