

**In Arbeit**

# macOS Installation auf ASUS B550 CREATOR mit Ryzen 7 3700X & RX 5700XT

Beitrag von „Bob-Schmu“ vom 22. Oktober 2025, 10:01

[Zitat von Charon233](#)

okay, wie kann ich denn weiter vor gehen bei meinen fehlern?

Mal nur die kexte aktivieren, die nur notwendig sind.

| 17. IOPIC.kext                    | 17.2.2 (IOPIC.kext)       | <input type="checkbox"/>            | /usr/lib/KernelExtensions/IOPIC.kext          | /usr/lib/KernelExtensions/IOPIC.kext          |         |          | Any  |

Der ist veraltet, da gibt es schon seit 2024 eine 1.4.1 Version.

|                |                      |                          |                                       |                                       |  |  |     |
|----------------|----------------------|--------------------------|---------------------------------------|---------------------------------------|--|--|-----|
| 5. AMFPas.kext | 17.0.0 (AMFPas.kext) | <input type="checkbox"/> | /usr/lib/KernelExtensions/AMFPas.kext | /usr/lib/KernelExtensions/AMFPas.kext |  |  | Any |
|----------------|----------------------|--------------------------|---------------------------------------|---------------------------------------|--|--|-----|

Der ist genauso veraltet, die 1.7 Version unterstützt macOS 26.

|                  |                        |                          |   |   |  |  |     |
|------------------|------------------------|--------------------------|---|---|--|--|-----|
| 7. AppleRtc.kext | 17.0.0 (AppleRtc.kext) | <input type="checkbox"/> | /usr/lib/KernelExtensions/AppleRtc.kext | /usr/lib/KernelExtensions/AppleRtc.kext |  |  | Any |
|------------------|------------------------|--------------------------|---|---|--|--|-----|
