

# Modern Wifi Patch Tahoe

Beitrag von „fabiosun“ vom 3. Dezember 2025, 15:18

Pay attention also here it hangs the pc, it also detect audio patch i do not need in my system

## Root Patching

Root Patching will patch the following:

- **Networking: Modern Wireless**
- **Miscellaneous: Modern Audio**

```
- Starting Patch Process
- Determining Required Patch set for Darwin 25
Pulling KDK list from KdkSupportPkg API
No direct match found for 25C5048a, falling back to
closest match
Closest Match: 25C5037i (26.2)
```

My only doubt is that KDK is not the same for beta i use

Edit

It doesnt work also with 26.1 (with a correct KDK)
