

Installationsstick erstellen

Beitrag von „karacho“ vom 27. Dezember 2025, 12:24

Ich hatte vergessen einen Screenshot der Fehlermeldungen unter Linux hinzuzufügen.

```
Validation Report
Validation report for: /home/karacho/hardware-reporter/SystemReport/Report.json
Hardware report is not valid! Please check the errors and warnings below.
Errors (1):
  1. Root.System.Devices.PNPClass.ACPI.Path: Value 'SPPM' does not match pattern "[\\s|_]|([A-Z0-9-+]{1,4})"
Warnings (3):
  1. Root.BIOS: Unknown key 'Above 4G Decoding'
  2. Root.GPU: Advanced Micro Devices, Inc. [AMD/ATI] Vega 10 RX/XT [Radeon RX Vega 56/64]: Unknown key 'Bus Type'
  3. Root.Sound: Advanced Micro Devices, Inc. [AMD/ATI] Vega 10 HDMI Audio [Radeon Vega 56/64]: Unknown key 'PCI Path'
Suggestion: Please re-export the hardware report and try again.
Press Enter to go back... █
