

macOS 26 Tahoe auf den Hackintosh

Beitrag von „cobanramo“ vom 21. Februar 2026, 19:08

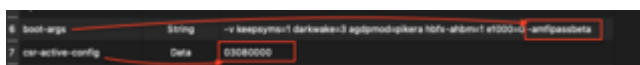

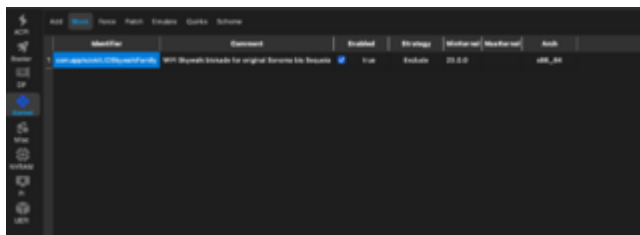

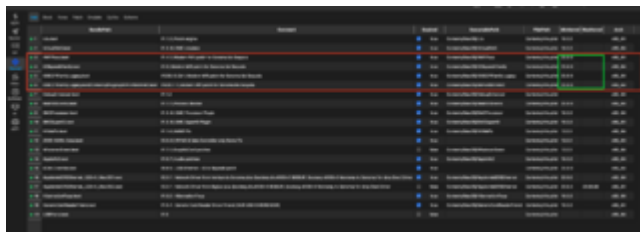

Zitat von UPS

welche kext brauche ich für die fenvi t919?

ID	BundlePath	Comment	Enabled	ExecutablePath	HotPath	MinKernel	MaxKernel
1	LibKext	91.0.2	True	Contents/MacOS/LibKext	Contents/HotPath		
2	VirtualSMC.kext	91.0.0	True	Contents/MacOS/VirtualSMC	Contents/HotPath		
3	IO80211Family.kext	91.0.0.2.20	True	Contents/MacOS/IO80211Family.kext	Contents/HotPath		
4	AppleIntelE801.kext	91.0.0	True	Contents/MacOS/AppleIntelE801.kext	Contents/HotPath		
5	IO80211Family.kext/Contents/PlugIns/ForceBSSID.kext	91.0.0.1	True	Contents/MacOS/ForceBSSID.kext	Contents/HotPath		
6	IO80211Family.kext/Contents/PlugIns/ForceBSSID.kext	91.0.0	True	Contents/MacOS/ForceBSSID.kext	Contents/HotPath		
7	IO80211Family.kext	91.0	True	Contents/MacOS/IO80211Family.kext	Contents/HotPath		
8	AppleIntelE801.kext	91.0.0	True	Contents/MacOS/AppleIntelE801.kext	Contents/HotPath		
9	AppleIntelE801.kext	91.0.0	True	Contents/MacOS/AppleIntelE801.kext	Contents/HotPath		
10	IO80211.kext	91.0.0	True	Contents/MacOS/IO80211.kext	Contents/HotPath		
11	IO80211.kext	91.0.0	True	Contents/MacOS/IO80211.kext	Contents/HotPath

13	IO80211.kext	91.0.0	True	Contents/MacOS/IO80211.kext	Contents/HotPath		
14	IO80211.kext	91.0.0	True	Contents/MacOS/IO80211.kext	Contents/HotPath		
15	IO80211.kext	91.0	True	Contents/MacOS/IO80211.kext	Contents/HotPath		
16	IO80211.kext	91.0.0	True	Contents/MacOS/IO80211.kext	Contents/HotPath		

1. deine Kexte haben den falsche reihenfolge...
2. ein T919 braucht sicher kein Airportitlwm.kext...

So sollte das sein, dann kalppt auch von Sonoma bis Tahoe...

Bis Sequia benutzt man den originalen OCLP, für Tahoe muss es OCLP-Mod sein !

Gruss Coban
