

Chameleon Boot-Stick unter Windows erstellen !

Beitrag von „TuRock“ vom 23. Oktober 2013, 18:20

Ich denke mal das du was falsch eingegeben hast !

z.B. Falsch

Code

1. C:\Documents and Settings\Administrator\Desktop\bootsector>makeusb.bat f:\
2. Format f:\ ...
3. Create boot sector ...
4. error E2003: File was not provided!
5. ERROR: Read DBR: failed - Failed to create files (LastError: 0x3)!
6. ERROR: Read MBR: failed - Failed to create files (LastError: 0x3)!
7. Could Not Find C:\Documents and Settings\Administrator\Desktop\bootsector\usbbs3
8. 2.bin

so sollte das ganze aussehen (Richtig) :

Code

1. C:\Documents and Settings\Administrator\Desktop\bootsector>makeusb.bat f:
2. Format f: ...
3. Create boot sector ...
4. Read DBR: successful!
5. Patching FAT32 BPB: successful!
6. Write DBR: successful!
7. Write MBR: successful!

PS: das funktioniert 😊
