APPLEHDA ACTIVATION

Beitrag von „Sofista“ vom 19. Juni 2016, 17:54

how to enable appleHDA ALC887 codec MacOS Sierra 10. 12?

Beitrag von „kuckkuck“ vom 19. Juni 2016, 18:29

Do you already have MacOS Sierra installed?

Beitrag von „Sofista“ vom 19. Juni 2016, 19:38

once installed and activated the sound using Voodohda but got the audio with noise, but wanted to enable appleHDA my codec is ALC 887! but before you install again MacOS Sierra wanted to know how to enable AppleHDA in 10:12, you have a tutorial?

Beitrag von „kuckkuck“ vom 19. Juni 2016, 20:00

You can use Voodoo HDA in MacOS Sierra. The Noise can be removed by putting the Input Gain in the System Settings to 0.

Beitrag von „Sofista“ vom 19. Juni 2016, 21:07

But how? the configurator clover does not work on MacOS Sierra?

Beitrag von „kuckkuck“ vom 19. Juni 2016, 22:33

Just install this pkg: [VoodooHDA Versionen](#)

I want to use appleHDA MacOS Sierra ... how do I activate the sound ... my codec is ALC 887?

Beitrag von „Sofista“ vom 24. Juni 2016, 04:57

using applehda patch application to activate the audio on MacOS Sierra ALC 887 codec ...? It has a tutorial of how to use this application applehda patcher?

You should stay in one Thread with your question and should not open up another one with the same underlying problem.

That's why I moved the above post into this thread.
