

Stuck at boot logo (MACOSX Catalina) at Dell inspiron 7359 13"

Beitrag von „netseeder1008“ vom 20. November 2019, 19:53

Hello Guys,

i want to try hikintosh catalina in my laptop. so i follow this tutorial-
<https://www.youtube.com/watch?v=XnKLeVK65Zw&feature=youtu.be>

and download installer files from - <http://dosdude1.com/catalina/>

i able to create hakintosh USB and set my bios as-

UEFI-enable

Secure Boot-Disable

Virtualisation- Enable

Sata Config- AHCI

while clover start i press space and select set nvidia to vesa(nv_disable=1) as per video show

but when i select to install cataline from USB it stuck at Apple logo.

so can someone suggest me where is my fault and how i able to install hakintosh step by step for my DELL inspiron 7359 13". 🤔
