# AX2000 Wifi on MSI x570 A Pro

### Beitrag von „iamprabhuantony" vom 14. Juni 2021, 14:16

I am using ax2000, on my Ryzen3600, msi x570 A Pro...smbios is iMac pro. Also waiting for the patches to get released. Please guide me for RP0X. Please share your ssdt, if possible. Thank you!

Hi and welcome to the forum... 🙂

I had to separate your request since it doesn't have anything to do with the Broadcom BCM94360NG.

On my X570 it is under _SB_.PCI0.BXBR.BYUP.BYD3, so it might not be RP0X on your machine too.

But if you can't modify the SSDT yourself I'd suggest to wait installing the Beta anyway until all those small issues have been sorted out and guides have been updated.
